Democratic Mass Meeting at Hustisford.

brrespondence of the Sentinel. Hustisford, Oct. 31, 1860. MR. EDITOR: -On the 29th inst., CHAS. H. LARRABEE addressed the citizens of this place upon the political issues of the day. As the report has gone abroad that the Re-

publicans disturbed, and tried to break up that meeting, I ask room in your columns to make the denial and state the facts. In the first place, allow me to say that ever since I have lived in the town, it has been the policy of some of the leading Demoorats here to be very friendly and social just before election with certain men, who, unfortunately, either love poor whiskey, or the fuddle it produces. Unite too often have

they succeeded in obtaining votes by this kind of friendship and whiskey liberality. These one horse politicians have been pursuing this miserable policy ever since the commencement of the present campaign .--On the day Judge LARRABEE spoke here, they were exceedingly generous, and ancceeded in getting one Republican a little

"tight." Well, this Republican, Mr. L---, be lieving LARRABEE to be honest in requesting any one to ask questions who felt disposed, ventured, in a very low tone of voice, to make some enquiries. The Judge told him to keep quiet, which he promised to do; but forgetting himself, he soon asked another question, for which he was uncere moniously taken by the collar by two rather officious Democrats, ("one of whom had but recently disturbed a Republican meeting in this place") and dragged from the crowd,

This created a little confusion, but all was quiet in a moment, and the speaking went on. After having been treated two or three times by a leading Democrat, Mr. Lwas allowed to return to the growd, where he soon began to ask questions again,-Again he was selzed, and with violence and blows, dragged some little distance, when he was met by some Republicans and induced to leave and stay away. This is the amount of the disturbance, and it was made by the Democrats themselves. They alone are responsible for it. To them belongs al. the glory of the disgrace. I believe they were anxious to create a disturbance for the

sake of effect. They know that the brutal attack made by the Democrats of Watertown upon the Wide Awakes of this place, on the occasion of our recent visit there, inured to the benefit of Republicanism, and they wanted to counteract that influence. Unfortunately for hem, they have bitten off their own noses, at their own expense. Such are the facts. We challenge successful contradiction.

WALDO LYON. To the Republicans of Kentucky.

The signs of the times clearly indicate that the people will on Tuesday next elect Abrohem Lincoln and Hannibal Hamlin to the offices of President and Vice-President But every Republican must do his part to a secure success. Do not leave the work to a leave the mork to a of secure success. Do not leave the work to a home few. Let us all do what we can to win the day. Our State is all right; our Congressional District is all right; our Congressional District is all right; and we can make Milwankee all right. Shall it not be done?

Vote for Charles Civerno.

CHARLES CAVERNO, the Republican nomines for Assembly, in the Fourth Ward, is a young man of brilliant promise. We have heard the heartiest praises of his taltents and character from all sources. His speeches in the present campaign have been productive of good wherever and whenever a delivered.

When we have the account of the constitution, will be sworn to support that Constitution, will be sworn to support that Constitution and firmly to execute all laws enacted in accordance with its provisions. The Republican party has plainly declared its off the country is that it shall be judged by its principles are understood and expounded by its own members, and as they shall be practically carried out in the legislation of the country. This reasonable request has never yet been deuled to any party having the control of our National Government. Our candidates are tried and true men. They come up fully to the Juffersonian atandard. "They are honest, capable, and faithful to the Constitution." When elected, they will administer the Government for the benefit of the whole the Government for the banefit of the whole

country, and not for the benefit of one sec-tion at the expense of the other.

A NEW RAT TEAP .- A common meal bag is spread upon the floor, a handful of meal sprinkled over the inner surface. Fusion. - The Administration hucksters, in their auxiety to elect Breckfaridge, now In their anxiety to elect Breekinridge, now advertise that they have effected a fusion bayed in buying up newspapers, orators, political sgents, Members of Congress are as confident that her thirty-five electoral votes will be cast for Lincoln and Hamlin, as that Vermont will go for the Republican candidates:

New York, Oct. 30th, 1860.

Hobace Rubler, Esq., Chairman State Campal Committee:

My Dear Sir:—The fusion journals are endeavoring to create the impression abroad, that this State will cast her electoral vote against Lincoln.

Be assured there is not the slightest foundation for the untruthful assertion.

This State is sure for Lincoln and Hamlin by not less than 50,000 majority.

Respectfully yours, S. Dearse,

This state is sure for Lincoln and Hamlin by not less than 30,000 majority.

Respectfully yours, S. Drafes, Chairman N. Y. State Central Com.

A DAY IN THE ABERICAN WATCH COMPA NT'S MANUFACTORY AT WALTHAM.

BY BELLE DRITTAIN.

From the New Orleans Picayune,

A day in a watch manufactory is as worthy of "special notice" as a day on board the great ship. From an inspection of both one sees the maximum and minimum of m chanical invention and aphievement. All mechanical intricacies disappear as the scale of construction is enlarged; and although such world-famous monsters as the Pyramids. the Coliseum, and the great ship overwhelm us by the force of mere magnitude, yet there is quite as much to excite the "bump of is quite as much to excite the "bump of wonder" in the operation of a little machine driven by steam, that turns out well-out screws visible only by the aid of the Micro scope! Such a curious contrivance may be seen, any day at Watthem, assisting in the delicate art of making watches. And, surprising as it may appear, this enterprising and ingenious American company have invented machinery for the separate fabrication of almost every one of the one hundred and twenty-five different parts employed in the composition of a watch. The metals, the jewels, and whatever else is used in the construction of this beautiful and wounderful piece of mechanism, seem to be thrown in at piece of mechanism, seem to be thrown in at one end of the establishment in a raw and in-ert state, and to come out at the other a complete and almost living organism, with a "beating" heart, a speaking "face," and "beating" heart, a speaking "face," and "hande" raised, as it wise, in astonishment at the phenomenon of its own creation!

The value of a watch, of course, consists

The value of a watch, of course, consists in its accuracy; and in one of these American watches we may feel the absolute confidence we have in a fixed who has never deceived us. And for this reason: so much of the work is made by unerring machinery, that in their movements we are gustanteed a perfection and uniformity of motion unabstracted by the large even required tions. perfection and uniformity of motion unitational tainable by the less exact manipulations of the most expert hand; for instance—here is a machine that turns out microscopic screws at 150,000 to the pound—and all equally perfect. It would be utterly impossible for any human hand to make two exactly alike; and it is a curious fact that a man can construct a machine which will do a nice place of the perfect in the blue perfect with his of work better than he can do it with his own hands. The sewing machine sews bet-

ter than the man who invented it. ter than the man who invented it.

But mechanical accuracy is not the only point of success achieved by the American Watch Company. The labor-saving feature in their manufacture is enabling them to sell a better article at a less price than can be had of their European competitors. They now employ in their manufactory, at Waltham, about 250 operativus, on a third of whom are women; and when it is known that one young girl, by means of newly invented machinery, at a salary of \$8 a week. vented machinery, at a salary of \$8 a week, does the work of four men, formerly employed sta salary of \$25 a week sach, the public will understand why it is that the public will understand why it is that the American watch is cheaper than the Swiss, with only four per caul, protection. And when our people are fairly convinced that the home-made article is really better and cheaper than the imported, the \$5,000,000 annually sent abroad for the purchase of Enropean watches will be paid to our more ingenious manufacturers in America. The law of self-interest, which is a higher and more nuiversal law than nativoism, will allaw of self-interest, which is a higher and more universal law than patriotism, will al-ways lead men to buy where they can buy oheapest; and with the primeval laws of human nature it is never wise to quarrel—
